

Fill in the gaps

I know (1) it is freezing		Well it takes one to know one, kid	
But I think we have to walk		I think you've got it bad	
I (2) waving at the taxis		But what's so easy in the evening	
They keep turning their lights off		By the morning is such a drag	
But Julie knows a party		I've got a flask inside my pocket	
At some actor's west side loft		We can share it on the train	
Supplies are (3)	in the evening	And if you promise to stay conscious	
By the morning they'll be gone		I will try and do the same	
When everything is lonely		Well, we might die (7) medication	
I can be my own best friend		But we'll sure kill all the pain	
I get a coffee and the paper		But what was normal in the evening	
Have my own conversations		By the (8)	seems insane
With the sidewalk and the pigeons		And I'm not sure what the trouble was	
And my window reflection		That started all of this	
The mask I polish in the evening		The reasons all have run away	
By the morning looks like ****		But the feeling never did	
And I know you (4) a (5) heart		lt's	
I can feel it when we kiss		Not (9)	_ I would recommend
So many men stronger than me		But it is one way to live	
Have thrown their backs out trying to lift		'Cause what is simple in the moonlight	
It		By the morning never is	
But me I'm not a gamble		It was so simple in the moonlight	
You can count on me to split		Now is so complicated	
The love I sell you in the evening		It was so (10)	_ in the moonlight
By the morning won't exist		So simple in the moonlight	
You're looking (6)	like a model	So simple in the moonlight	
With your eyes all painted black			
You just keep going to the bathroom			
Always say you'll be right back			

- 1. that
- 2. keep
- 3. endless
- 4. have
- 5. heavy
- 6. skinny
- 7. from
- 8. morning
- 9. something
- 10. simple
