

Fill in the gaps

		All I want is a place to call my own
I'm always (1)	my lungs out	To mend the hearts of everyone who feels alone
'Til my head starts spinning		You know to keep your hopes up high
Playing my songs is the way I cope with life		And your head down low
Won't keep my voice down		All I want is a place to call my own
Know the words I speak		To mend the hearts of everyone who feels alone
Are the thoughts I think out loud		You know to keep (5) hopes up high
I like to keep things honest		And your head (6) low
I'm a safe bet like your life's staked on it for real		If you take it from me
I'd hate to keep you all wondering		Live your life for yourself
I'm constant like the seasons		'Cause (7) it's all said and done
I will never be forgotten man		You don't (8) anyone else c'mon
Let's leave no words unspoken		So let's get back to when
And save regrets for the broken		Everything seemed perfect
Will you even (2) back		Not a worry in the world
When you think of me?		Tell me was this all worth it?
All I want is a place to call my own		I get what I want so everyone's always judging me
To mend the hearts of everyone who feels alone		I'm not afraid of anything
(Whoa)		And I've got the (9) world in front of me
You know to keep your hopes up high		All I want is a place to call my own
And your head down low		To mend the hearts of everyone who feels alone
Keep your hopes up high and your head down low		You know to keep (10) hopes up high
Still got something left to prove		And your head down low
It tends to keep things moving	n'	All I want is a place to call my own
While everyone (3)	me says	To mend the hearts of everyone who feels alone
My last days are looming overhead		You know to keep your hopes up high
But just what the hell do they think they know?		And your head down low
I (4) my head above the water		Keep your heads down low
While they drown in the undertow		Keep your heads down low
Let's leave no words unspoken		Keep your hopes up high
And save regrets for the broken		Keep your heads down low
Will you even look back		
When you think of me?
