

## Fill in the gaps

<em>-So tell me about your mother- (en algunas versiones)</em>
Doctor, doctor, could you please just give me
something
For the state I'm in?
I'm (1) trouble and society believe
I got it wrong again
I'm one month (2)
I don't think I'm getting over my predicament
But if I jumped out of the window what would she say?
It's not on me, it's all on you
We can't deny the things we do
I can't (3) her pretty feet
Walked (4) me, all over me
(5) me, help me doctor
It seems to be an awful lot for me to understand
I know I'm not a specimen
The troubles and the mess I'm in
I should be dead
He said, let's all think
Then you've had all your fun
It's time to be a man
So you better quit your bitc*ing
Think about what the people would say
It's not on me, it's all on you
I can't prescribe what you want me to
You need some sleep, you better leave
He walked over me, all over me
Wait until tomorrow, and it's gone

So long

Wait until tomorrow, so long	
And it's gone	
Wait until tomorrow	
You beg and (6) and borrow till it's gone	Э
-He don't got a lot but he's got all he needs-	
I need someone to love	
-And all he's got well it's all that he needs-	
Somebody help me because	
I could hear the voices in the tube	
To get me through anything	
I do and (7) will do good by me	
A (8) pill, a (9) thrill	
Should I take it? I think I will	
And anything will do good so	
As long as it's always too good	
(10) way I don't give a d*mn	
What you people all say	
All now boy	
It's not on me, it's all on you	
I can't deny the things I do	
I can't believe her pretty feet	
Walked over me, all over me	
It's not on me, it's all on you	
There comes a time to speak the truth	
So you can see me when I leave	
Walk over you, all over you yeah
