

Fill in the gaps

_ for life

It's been a while since the two of us talked		I was down on one knee and you were (6) for life
About a week since the day that you walked		We were (7) we would never be apart
Knowing things would never be the same		With your name tattooed (8) my heart
With your empty heart and mine full of pain		Who would have thought it would end up like this?
So explain to me, how we came to this		Where everything we talked about is gone
Take it back to the night we kissed		And the only chance we have of moving on
It was Dublin city on a Friday night		Is try to take it back before it all went wrong
There were vodkas and coke, I was Guinness all night		Before the worst, before we mend
We were sitting with our backs against the world		Before our hearts decide
Saying things (1) we (2)	but	It's time to love again
never heard		Before too late
Who would have thought it would end up like this?		Before too long
Where everything we talked about is gone?		Let's try to take it back before it all went wrong
And the only chance we have of moving on		And if the clouds don't clear
Is try to take it back before it all went wrong		(9) we'll rise above it, we'll rise above it
Before the worst, before we mend		Heaven's gate is so near
Before our hearts decide		Come walk with me through
It's time to love again		Just like we (10) to, just like we used to
Before too late		Let's take it back before it all went wrong
Before too long		Before the worst, before we mend
Let's try to take it back before it all went wrong		Before our hearts decide
There was a time		It's time to love again
That we'd stay up all night		Before too late
Best friends yet talking till the daylight		Before too long
Took the joys alongside the pain		Let's try to take it back before it all went wrong
With not (3) to loose, but so much to gain		
Are you hearing me? Because I don't wanna miss you		
You (4) adrift on memory bliss		
In (5) Grafton Street on a rainy night		

- 1. that
- 2. thought
- 3. much
- 4. were
- 5. this
- 6. mine
- 7. thinking
- 8. across
- 9. Then
- 10. used
